Hi guys,

If you want to have this mod on KSP 1.9.1 just download it and also download this mod too :

<https://spacedock.info/mod/1808/OPT%20Reconfig>

This worked for me on KSP 1.9.1.

Don't thank me, it's natural.

: D

Will this ever be updated or is it permanently abandoned?

[Report](#) [Reply](#) [Quote](#) [Multi-quote](#)

Posted Mar 8, 2020 #193

please update it to 1.9.1

Has this been approved by @K.Yeon to be posted here? or by Jade of Maar who is the current custodian of OPT?

Disregard this is probably the MA lol

Update the mod to the version of ksp v 1.7.1 please

I can't create a very great space shuttle. please update the mod to 1.7.1 🙏🙏🙏🙏

I think that this mod should continued into KSP version 1.7.x. It would open up opportunities for newer users to access it. pls thx.

I hope that a new version will be released soon. It is sorely lacking.

Im having a problem with all my fuselages where they have no fuel in them and im having to put smaller tanks inside of them just to have some fuel.

hi

Are you aware that OPT uses fuel switch? right click the parts you should see option to switch to different fuel tank configurations.

In reply to [Chammy2](#):

right click on the fuselages and click the next fuselage button. that should fix your problem

anybody else having isseus with asymmetric forces on the wings due to lift or drag?  
at ~300m/s all my spaceplanes that uses OPT wings turns left or right.

It hase nothing to do with engines because I did some testing with stock wings and didnt get any problems with strange yawing of my spaceplane, but when I changed the stock wings for OPT wings (all the rest stock) the spaceplane yaws to the left or right at high speeds.

I was having this same problem. Thought it had ruined a good 2 hour plane build.
